EDUCATION

Bachelor of Technology
in AI/ML
MLRIT Hyderabad, May
2025

Gayatri Srinivasan

Frontend Developer & UI/UX Designer

SUMMARY

Junior frontend developer and UI/UX designer with 3 years of experience in designing web experiences for AI products in React.js and Next.js. Building customer-facing assets like websites, logos, brand guidelines, and dashboards, while integrating APIs to make the experiences functional.

EXPERIENCE

Payintelli

Hyderabad

June 2025 - Present

Frontend Developer & UI/UX Designer

- Built and shipped 7+ frontend modules for our fintech AI products in React and Next.js, working from Figma designs through to production and API integration.
- Designed PayIntelli's brand identity from scratch: logo, brand guidelines, and a visual system used across product, web, and team comms.
- Created several supporting brand assets including: email mailer templates, email signatures, and product visual collateral.

Delivery Coordinator

June 2025 - Present

- Set up project management workflows in Notion and ClickUp for a 12-person cross-functional team (engineering, design, AI)
- Coordinated task tracking, resource allocation, and handoffs across product, design, and AI work streams.

PXP Financial

Hyderabad

Business Intelligence Intern

Feb 2025 - May 2025

- Built the internal web interface for an AI-based credit card fraud detection system including 4+ dashboard pages in React.js handling 500k+ transactions in real-time.
- Designed the UI to surface model output: flagged transactions, performance metrics, graphs, weekly and monthly summaries

InLustro

Hyderabad

Full Stack Developer

Mar 2024 - May 2024

- Performed backend improvements for Syntra, a management tool, focusing on system efficiency and maintainability
- Made UI/UX adjustments across user personas and integrated PostgreSQL for data management
- Developed and documented platform design, working with stakeholders to map technical dependencies and user needs

Frontend Developer

Aug 2023 - Mar 2024

- Designed initial concepts for a Google Meet plugin, exploring integrations with Slack and Microsoft Teams
- Built UI components in React.js from Figma designs: login, signup, goal progress, meeting summaries

PROJECTS

Daysie

[AppStore](#) | [GitHub](#)

- Shipped an iOS widget for event countdowns with 1200+ customizations: backgrounds, countdown type, colors, font, symbol, size.

Many Worlds

[Demo](#)

- Designed a world model-based 3D platformer game in reactor + alakazam studio based on collecting thematic objects to be transported into a real-time generated world.
- Shipped in under 24 hours during hackathon, and featured in the Reactor newsletter.
